

SIGMA WIRELESS

Professional Communications, Networks and Solutions.

Press Release.

Irish Aviation Authority Radio Backup System.

September 2012

Sigma Wireless Communications are delighted to announce the successful installation and site acceptance of an Emergency Radio Back-Up System for the Irish Aviation Authority.

Working with our partners Copperchase and MEP (Holland), and with the IAA we have designed and implemented a solution that meets the specific requirements.

Sigma Wireless Communications is a leading Communications System Integrator with long established relationships with the IAA.

Copperchase is a leading supplier of equipment to the Air Traffic Control Industry.

MEP (Amsterdam) is a supplier of Highly Reliable voice products to the ATC and Maritime markets.
