

Operator Working Positions

THE BEST CHOICE FOR YOUR CONFIGURATION

Operator Working Positions

THE BEST CHOICE FOR YOUR CONFIGURATION

Our systems are in use 24/7. The right working position for operators directly influences their performance. Your best choice depends on the specifics of each working environment and equipment in use. We therefore provide a variety of options. Our experts can help you to select the best choice for you.

TBP990

15 inch touch screen

The TBP990 is a 15 inch touch screen and has a high brightness 1000 CD/m² LED lightened display with a wide viewing angle. All electronics are integrated into one unit with minimal wiring. The panel has a built-in microphone, two speakers, two volume controls and a PTT touch button. Connections are available for headset, handset and external microphone/speakers at the rear and on the side. The panel is equipped with low power electronics. No additional ventilation is necessary, and so no noise is generated. The operation is intuitive and works with tab pages and pictograms to minimize the number of operator actions. Its connection to the switch is based on E1 or Ethernet TCP/IP.

CONSOLE TCP990

12 inch touch screen

The TCP990 is a 12 inch touch screen console with a LED panel with light output of 1000 CD/m² and a wide viewing angle. This console is designed for built in. External audio devices such as headphones, handsets and speakers can be connected via a separate audio unit (TCU/ACU).

CONSOLE STP990/RED

5.7 inch touch screen

The STP990 console with a 5,7 inch TFT screen is meant for built in in a desk or Euro Rack. This complete console has a built in microphone, 2 speakers, 2 volume controls and a PTT button. This console is often used in smaller airports or last resort systems. The STP990 console is also available in the color RED.

TBP990

CONSOLE SVP990/RED

5.7 inch touch screen

The SVP990 is executed vertical and for the rest identical to the STP990. This complete console has a built in microphone, 2 speakers, 2 volume controls and a PTT button. This console is often used in smaller airports or last resort systems. The SVP990 console is also available in the color RED.

AUDIO INTERFACE TCU990

External audio interface

The external audio interface TCU990 can be connected to all our consoles. It exists of a speaker, 2 volume controls and handset with integrated PTT and a separate PTT touch button. The TCU990 can be used on the desk or built in.

CONNECTOR ACU990

Audio junction box

The ACU990 connects headsets and handsets. There are line ins for 2 operators and 1 for a mentor. Electrets and dynamic microphones are supported. The ACU990 can be positioned on a desk or can be wall mounted

PC BASED SYSTEM

We can also provide a PC based solution. Please talk to our experts about the (dis)advantages of such a set up.
